2.3.3. The issuer's liabilities relating to security provided to third parties.

The Company did not place any securities from the beginning of 2003 till the end of the reporting quarter.

2.5. Risks related to acquisition of issuing securities placed or being placed.

2.5.1. Industry risks.

Industry risks of the Company are driven by the business environment at both export and domestic markets and the level of competition in the industry.

The key factors affecting world hydrocarbon prices include:

- global economic growth and economic development of the largest oil consuming countries;

- balance between supply and demand;

- geopolitical situation in oil producing regions;

- weather conditions in oil-consuming countries;

- price for and availability of alternative energy sources.

Domestic oil and petroleum products prices are driven by world prices and also by:

- transport infrastructure development;

- diversification of export deliveries to new markets;

- taxation and export regulations.

Factors which determine prices for energy resources are beyond the Company's control. If the price trends change, the Company is in a position to redirect commodity flows, reassess its investment projects, and reduce costs.

The Company is competing with other oil companies to obtain field development and production licenses, acquire assets, and gain access to the pipeline system and refining capacities.

2.5.2. Country and regional risks.

The Company's country and regional risks include political, economic, and social risks existing in Russia.

The stable social and political situation and better economic conditions in the country mitigate the effects of country risks on the Company's operations.

The Company operates in 16 constituent territories of the Russian Federation, such as Western and Eastern Siberia, the central and northwestern regions of the country. Although these territories are not prone to natural disasters, the Company's hydrocarbon production operations are carried out

in regions with harsh climate which may affect the Company's general performance. Some production facilities of the Company are hard to reach; work schedule for these areas depends heavily on duration of the navigation period or availability of winter roads.

2.5.3. Financial risks.

The Company is engaged in foreign economic activity and earns a significant part of its income from export of crude oil and refined products to foreign markets. Since export contracts typically use the US Dollar as the main currency for payments, any changes in the national currency/USD rate may substantially influence the Company's financial performance.

Interest rate risks have less impact on the Company's operations owing to its strong financial position, absence of heavy debts, and availability of funds to carry out strategic projects. However, changes in interest rates related to the reevaluation of country risks may entail changes in the Company's requirements for investment project returns.

Inflation affects the Company's performance adversely and escalates costs due to higher tariffs of natural monopolies and prices for raw materials, supplies, components, and equipment. This risk is beyond the Company's control but the Company is mitigating it by establishing and maintaining long-term partner relations and reducing dependence on suppliers through in-house production.

The Company does not hedge financial risks but takes into account their impact on its operating and financial activities when developing investment projects, financial plans and budgets.

2.5.4. Legal risks.

Fundamental legal risks of the Company include:

- changes in tax law;*
- changes in customs law;*
- changes in exchange regulations;*
- changes in forest law;*
- changes in land law;*
- changes in subsoil law and provisions;*
- changes in licensing regulations;*
- changes in environmental regulations and rules.*

When carrying out its operations, the Company observes the Russian law in force, fulfills its obligations to partners, and minimizes legal risks.

2.5.5. Risks related to the issuer's operations.

The Company is engaged in hydrocarbon production, processing and marketing and is therefore subject to risks typical of all oil producers, including: changes in global and domestic prices for oil, gas, and petroleum products, higher tariffs and prices for materials and equipment, development of Russian transport infrastructure, more stringent tariff and non-tariff regulations within the industry, and operational risks associated with specific features of the production process.

Prospecting, field development, oil and gas transportation, processing, and sales are a complex and capital-intensive process fraught with operational risks, including technological and environmental risks.

The Company minimizes technological risks of the production process by maintaining and renewing fixed assets, introducing new equipment and technology, cooperating with research organizations, and employing highly-qualified personnel.

The Company's environmental risks are related to significant environmental impact of the production process. To reduce the effect of these risks, the Company implements a wide range of measures to mitigate the impact and protect the environment, including gas conservation, land rehabilitation, and waste treatment.

Bank risks.

The Company is not exposed to bank risks as it is not a lending institution.

In carrying out its activities, the Company seeks to fulfill its obligations and minimize the impact of the risks.

The period when the issuer ceases to exist: **indefinite.**

Summary of the issuer's establishment and development: **The name of oil and gas producing company "Surgutneftegas" goes hand in hand with the discovery of Big Oil in Western Siberia.**

Back in March 1964, the first group of oilmen set foot on Surgut ground. Local climate and terrain did not let people lay out roads, drill wells and construct pipelines and field facilities in a conventional way. In fact, the oil producing division "Surgutneft" was a real testing ground where various technologies and methods were created and applied to develop fields in severe geological and climatic conditions. The division proved to be a true forge of skilled workers for the whole Western Siberia. Many oil and gas producing companies, such as Yuganskneft, Megionneft, Pravdinskneft, Kogalymneftegas, and Noyabrskneftegas, were once part of Surgutneft and later became separate entities.

Construction of the refinery in the city of Kirishi, Leningradskaya Oblast, began in 1961. As was the common practice of that time, the refinery was an All-Union Top Priority Project, and it indeed was built at a rapid pace: as early as December 1965, the refinery received the first oil tank car, and just four months later, in March 1966, it became fully operational. After it was commissioned, the refinery reversed oil products shortage, which hindered economic development of the North-West of Russia. When the Yaroslavl – Kirishi pipeline was put into service in 1969, the refinery started to process oil delivered from Western Siberia fields. Located close to the Baltic ports, it benefited from exporting oil products to Scandinavia and Northern Europe.

In October 1977, the oil producing division "Surgutneft" was granted the status of the diversified production association "Surgutneftegas" (PO "Surgutneftegas").

On March 19, 1993, the Council of Ministers of the Russian Federation passed a resolution to form Open Joint Stock Company "Neftyanaya Kompaniya "Surgutneftegas" (AOOT "NK "Surgutneftegas"). In the same year, PO "Surgutneftegas" transformed into AOOT "Surgutneftegas" and the Kirishi refinery transformed into AOOT "KNOS" were merged into Open Joint Stock Company "NK "Surgutneftegas".

Under the Soviet system, the Company's subsidiaries, namely Novgorodnefteprodukt, Kaliningradnefteprodukt, Lennefteprodukt, Pskovnefteprodukt, and Tvernefteprodukt, were part of RSFSR Glavneftesnab (Main Department of Oil Supplies) and supplied the corresponding regions with petroleum products. In 1993, they were also converted into open joint stock companies and incorporated in AOOT "NK "Surgutneftegas".

1996 saw the first stage of corporate structure optimization when AOOT "NK "Surgutneftegas" was formed as a vertically integrated company.

In 1997, the Company launched American Depositary Receipt program, Level I, for ordinary shares of OJSC "Surgutneftegas".

In 1998, it launched sponsored American Depositary Receipt program, Level I, for preferred shares of OJSC "Surgutneftegas".

In 2000, the Company embarked on the final stage of share consolidation, which made the oil producing entity OJSC "Surgutneftegas" a parent company of Surgutneftegas Group.

4.5 Oil industry trend analysis.

Over the last 5 years, the Russian fuel and power sector has been demonstrating high growth rate of hydrocarbon production, aggressive development of refining capacities, and expansion of transport infrastructure.

The key driving forces behind the industry's development are high global prices for crude oil, growing hydrocarbon demand, and enhanced crude export capabilities.

In 2003 – 2007, oil production in Russia increased by 16%, which made Russia the second largest oil supplier in the world. High growth rate of hydrocarbon production was driven mainly by aggressive development of existing fields by a variety of up-to-date oil recovery methods and development of new fields. However, crude output growth has been slowing down since 2005. The government introduced a number of tax incentives effective from the beginning of 2007 and concerning the Mineral Extraction tax for development of new fields in Eastern Siberia, mature fields, and fields producing high viscosity oil.

Over the last few years, oil companies have been investing more and more in field exploration: exploration drilling in Russia over the last 5 years grew by 31% to 871 thous. meters in 2007.

In 2007, domestic oil output increased by 2.3% against 2006 to more than 491 mn tons.

Gas production in Russia over the last 5 years went up by 5.3% to 653 bcm in 2007. Oil producers were the most active in this respect: they demonstrated a 45% growth in 2007 compared to 2003 while the share of oil companies in the total domestic gas production during this period increased from 7% to 9%. Associated petroleum gas utilization remains high on the industry's agenda.

On the refining side, in 2003 – 2007 the industry witnessed such trends as increased refining output and depth of oilstock conversion brought about by growing demand for petroleum products at the domestic market, more stringent requirements for petroleum products quality, and favorable price environment at the fuel market.

Over these five years, oilstock throughput at Russian refineries grew by 21.6% to 228.6 mn tons in 2007. Many refineries underwent modernization and renovation of production facilities; deeper oil conversion processes were introduced. As a result, refineries are producing more and more top quality petroleum products such as high octane gasoline and low sulfur diesel.

The Company's performance is in line with the general trends in the industry. In 2003 – 2007, the Company increased crude output and gas production by 19% and 2%, respectively. Today, Surgutneftegas is the fourth largest company in terms of crude output and the second largest oil producer in terms of associated gas production in Russia.

The Company takes part in developing fields in new regions such as Eastern Siberia and Nenetsky Autonomous Okrug. On the oil refining side, Surgutneftegas is carrying out a project to construct a hydrocracking complex to increase oil conversion depth and improve quality of petroleum products. The gas sector boom is driven by associated petroleum gas processing and gas utilization as feedstock for power generation. In 2007, the Company processed almost 7 bcm of gas and generated 2.467 bn kWh of power.

4.5.1. Analysis of the factors influencing the Issuer's activity

In the third quarter of 2008, the Company's performance results were influenced by lower hydrocarbons prices. The world Brent price and the average Urals price decreased in 3Q2008 by 5% and 4%, correspondingly, compared to the previous quarter.

In the third quarter of 2008, the Company produced 15.479 mn tons of oil and 3.495 bcm of gas. Gas processing in the reporting quarter totaled 1.7 bcm, power generation, 649.0 mn kWh.

4.5.2. The Issuer's competitors

The main competitors of the Company in terms of production performance are the largest Russian oil producers such as LUKOIL, Rosneft, TNK-BP, Gasprom neft, Slavneft, and Tatneft.

The key competitive strengths of the Company in hydrocarbon production include sound resource base in Western and Eastern Siberia and availability of advanced equipment and technologies for oil production which make it possible to develop hard to recover deposits and ensure high oil recovery levels at the Company's fields.

The competitive advantage of the refining segment is assured by close proximity of the Company's refinery to the sea ports and the Company's marketing divisions which ensure efficient oil products supply.

The Company's competitive advantage in the gas sector is creation of the full production cycle to produce, utilize and process associated petroleum gas.

The Company's Auditing Committee is established to supervise the Company's financial and business activities. Shares owned by members of the Board of Directors and the Company's Director General cannot vote to elect members of the Auditing Committee. A member of the Auditing Committee cannot be a member of the Board of Directors; neither can she/he hold a post of the Company's Director General.

Once a financial year is over, the Auditing Committee conducts an annual audit (inspection) of the Company's activities. An unscheduled audit (inspection) is conducted by the Committee at any time on its own initiative, in compliance with the resolution adopted by a general shareholders' meeting, at a shareholder's (shareholders') request in writing, provided the shareholder (shareholders) own(s) an aggregate of at least 10% of the Company's voting shares, or in accordance with the resolution passed by the Board of Directors. As requested by the Auditing Committee, the Company's officers must timely provide the Auditing Committee with all necessary information and documents on the Company's financial and business activities. Based on its findings, the Auditing Committee prepares a report.

The Auditing Committee is entitled to require an extraordinary general shareholders' meeting to be convened, following the procedure stipulated by the Company's Charter.

To have annual financial statements audited and confirmed, the Company annually hires a professional auditor who does not share any property interests with the Company or with its shareholders.

The Company's auditor is approved by a general shareholders' meeting. The auditor's service payment is determined by the Company's Board of Directors.

An audit of the Company's activities must be conducted at any time at a shareholder's (shareholders') request in writing, provided the shareholder (shareholders) own(s) an aggregate of at least 10% of the Company's placed shares.
